stainless & plastic toilets

Features:

- Completely self-contained
- 15 gallon capacity
- Easily installed and serviced
- Offered with stainless steel or plastic bowls

Extreme Testing (Beyond OEM Requirements):

- Toilets were vibration tested with a 400 pound load at 4x above the locomotive pulse
- Static load tests of 550 pounds
- Toilets were filled to capacity with water and frozen at -30°F for 6 hours

Working with major railroads, engineers, service personnel and OEMs, the Dayton-Phoenix Group has introduced a new line of stainless steel and plastic toilets. Our manually operated, recirculating toilets provide a compact and efficient facility for crew convenience without disturbing the environment. Stainless steel or plastic models are available.

All toilets are manufactured and tested in our 14-acre state of the art facility located in Dayton, Ohio. All of our new models meet or exceed the applicable requirements of EMD, GE and several railroads.
